CSE-AI ,1ST YEAR

FIX IT

(mobile app)

“technicians at your door step”

Why We Need This App

Nowadays it is easy to
find “engineers” than
technicians
so we came up with a
solution
“FIX IT APP”

OUR SOLUTION

- : saves time in finding technician
- : instant access to verified technicians
- : real time availability
- : user friendly
- : track bookings & payments in one app

HOW IT WORKS

open app & select appliance/service

see available technicians nearby and select

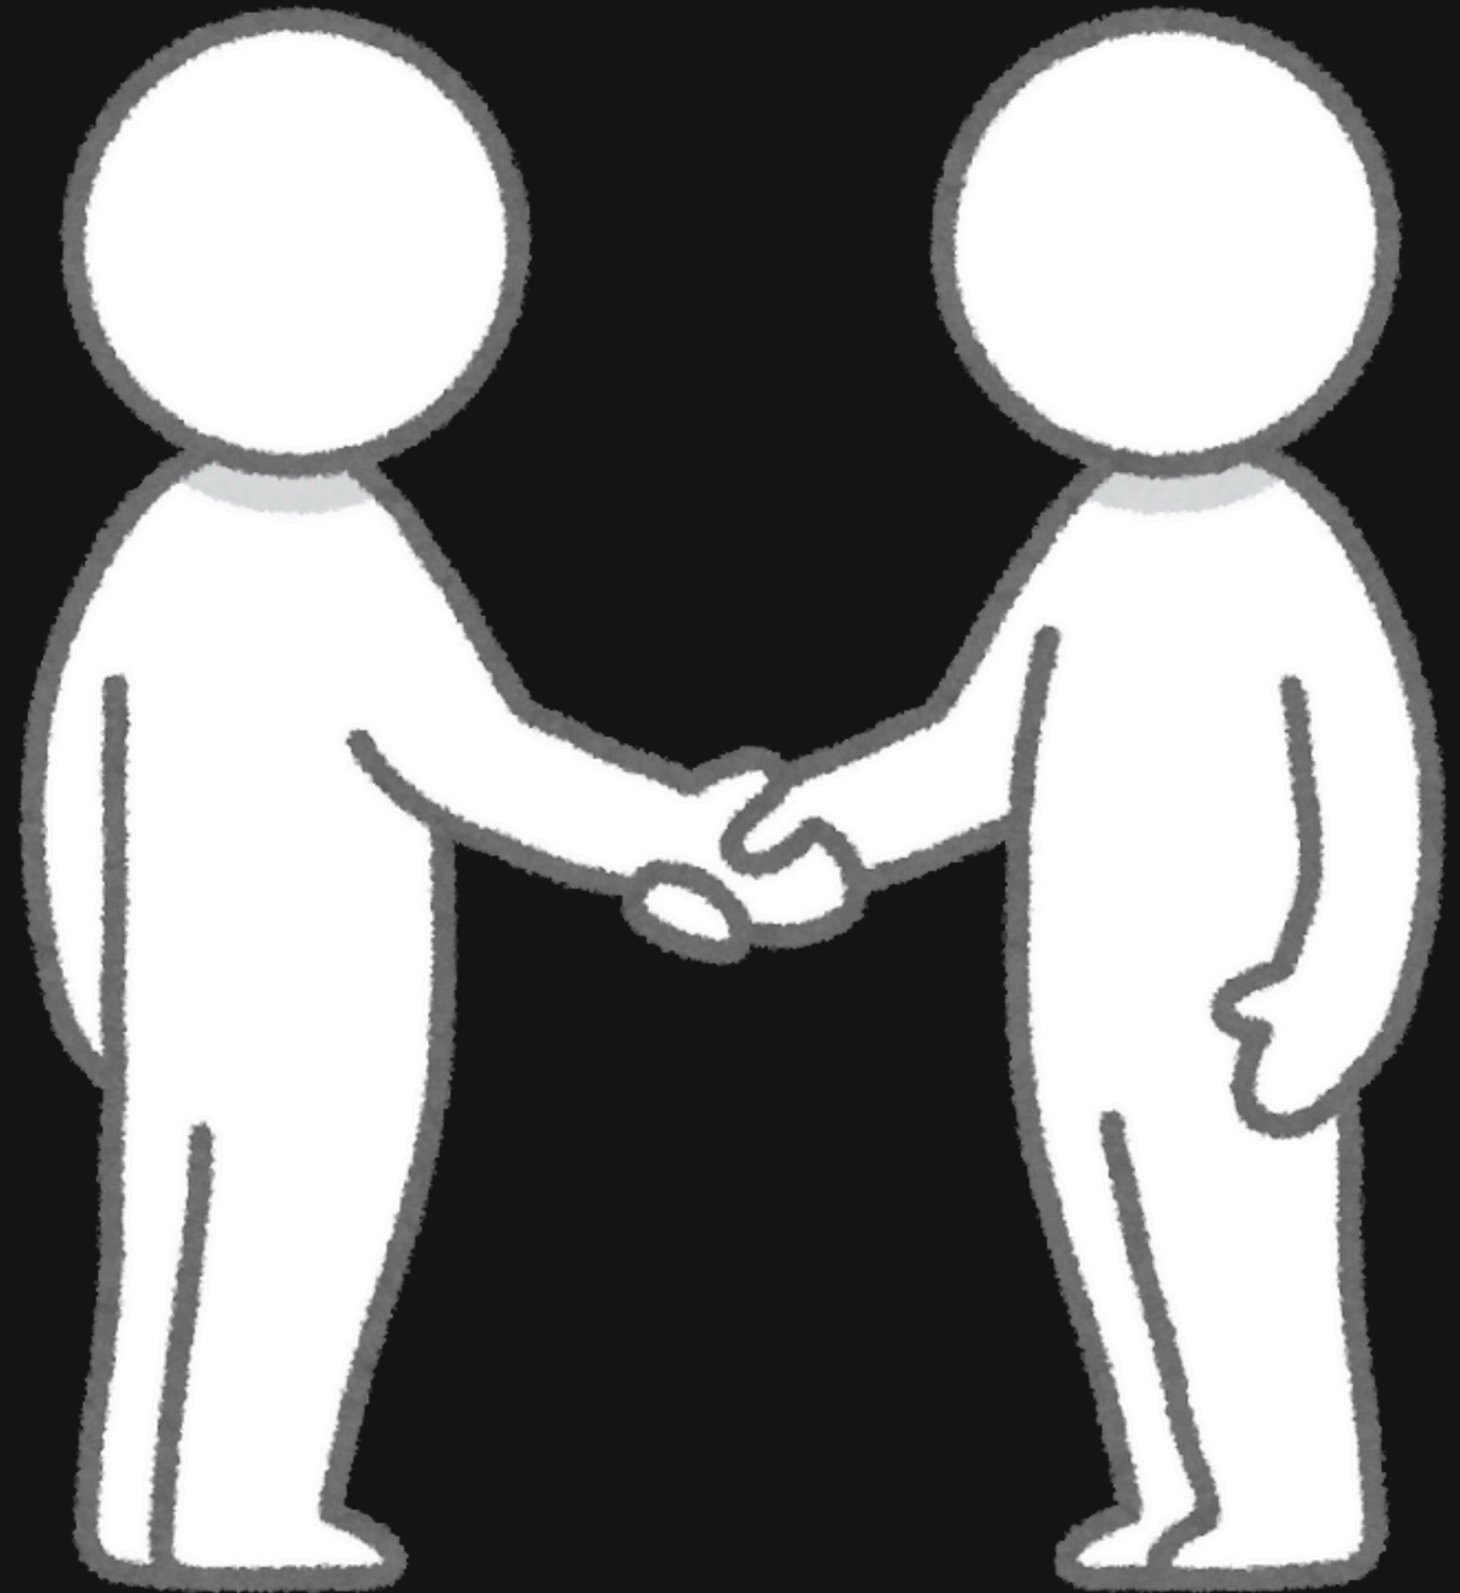

technicians arrive & service completed

give the rating and pay via app

BENIFITS

- : No more seasonal un employment
*for example - Ac repair technicians
- : No more waiting weeks for technicians
and also zero stress for the users
*for example - sudden problem of
washing machines
- : Whether you're 18 or 80, this app
makes life easier with its clear
layout and hassle-free experience."

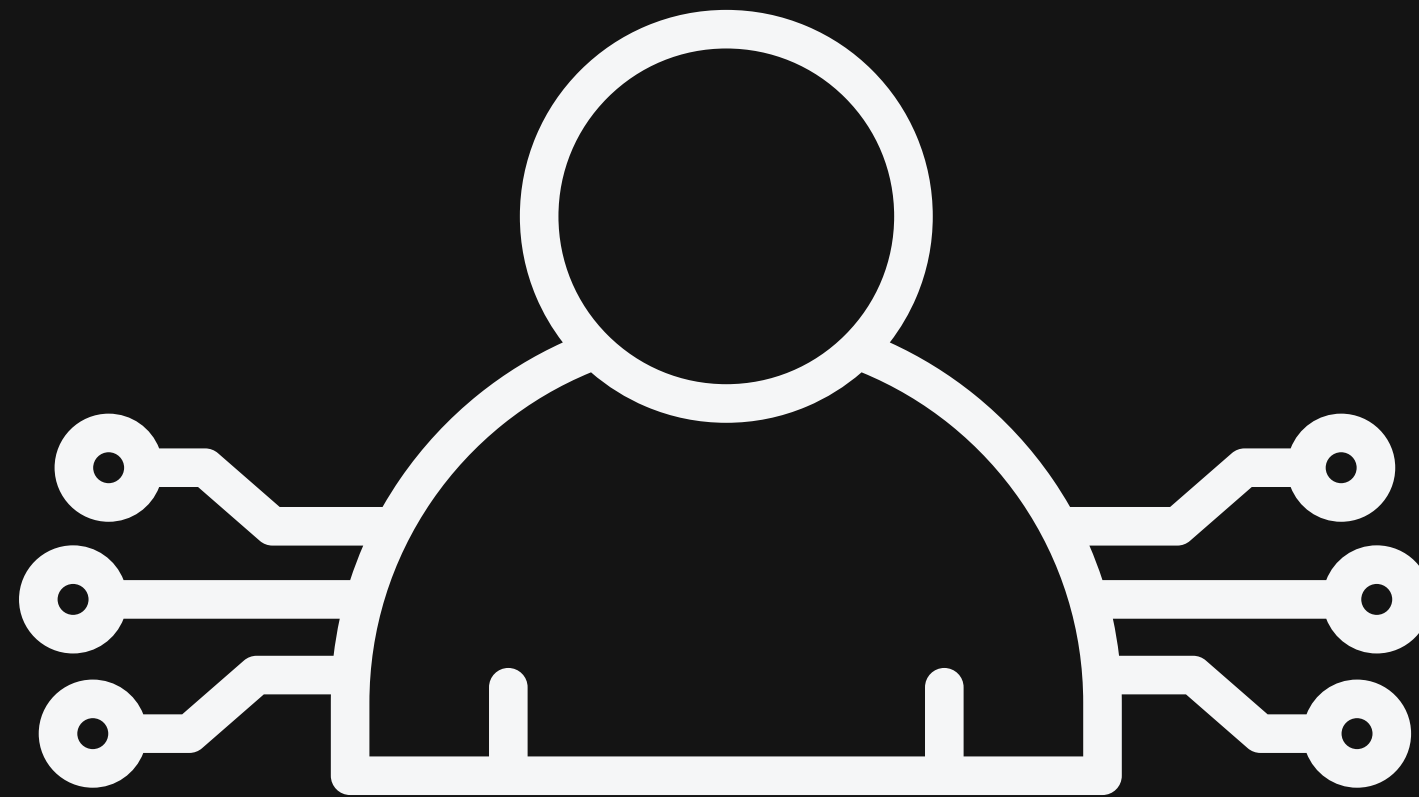

TECHNICAL APPROACH

: For front end we use “flutter”

: For backend we use “node.js”

: For data base and storage we use “fire base storage”

: For authentiction & notification
we use “firebase Auth + Fcm”

: For map navigation
we use “google maps API”
(FOR LIVE TRACKING AND
ROUTE GUIDENCE)

conclusion

"We conclude that finding a technician in our nearby area at the right time is no longer a problem."
